

**PARSAVED**

# HERBOCLEAN

Strong disinfectant product based on hydrogen peroxide and plant compounds

Exceptional and immediate effect on all  
broad-spectrum microorganisms  
without creating resistance

suitable for

aquatic

livestock

Poultry

- ✓• It possesses a longer-lasting disinfectant effect, is aromatic, and can be safely used in the presence of living organisms within livestock or poultry flocks.
- ✓• Disinfectant for poultry house surfaces and farm air sanitation.
- ✓• Disinfectant for hatchery equipment and eggs.
- ✓• For maintaining and improving the quality of drinking water throughout the rearing period.
- ✓• For cleaning and sanitation of watering troughs in livestock farms.
- ✓• Disinfectant for slaughterhouses and processing or packaging units.
- ✓• Disinfectant for all surfaces, tools, and equipment in livestock, poultry, and pet breeding or housing facilities.
- ✓• Disinfectant for fish farming and aquaculture ponds.

**In addition to its safe applicability in the presence of living organisms, HERBOCLEAN exerts beneficial effects on the respiratory system and functions as a bronchodilator.**

- In addition to its safe applicability in the presence of living organisms, HERBOCLEAN exerts beneficial effects on the respiratory system and functions as a bronchodilator.
- HERBOCLEAN eliminates microorganisms through the oxidative action of hydrogen peroxide, which disrupts protein bonds, ruptures cell walls, and oxidizes and inactivates essential enzymes.
- Due to the occurrence of more than 20 distinct chemical reactions triggered by this formulation upon contact with microorganisms, the development of microbial resistance through its use is rendered impossible.
- Therefore, with the use of Herboclean, there will no longer be any need for the periodic replacement or rotation of disinfectant compounds.
